

**Engage and interact securely with your customers! Store data online; enable partners or clients to access data from mobile devices- cell phones, PDA, black berries, laptops or a PC.**

Store, access, or share files online. QBU™ Storage brings a new level of flexibility and accessibility. Use the web to store information and let others access it from anywhere, with any type of web access (CDMA, GPRS etc). Uploading and organizing files is simple, and files can be kept personal or shared with partners, coworkers, contactors etc.

With the QBU™ Storage you can:

- Store data online – upload or download documents, movies, presentations etc.
- Download data to a cell phone or portable devices
- Simple to use – *no installation required on any device!*
- Keep private data away from preying eyes
- Share selected files with others
- Access, edit and work on your files away from office.
- Protect intellectual property.

Benefits for Enterprise:

- Limit access to company infrastructure.
- Ability to interact easily with contractors, agents etc.
- Ideal for Insurers, Architects, movie creators and anyone who needs sharing.
- Multiple options for documents, movies music etc.
- Copyrights strictly protected.

Example: The insurer AIG (IL) needs to share data with: agents, law offices and claim adjustors. The platform chosen, to share information securely between entities geographically spread, is QBU storage.
