

**Increase your revenues by offering clients, to securely store their data online and access it anytime, anywhere in the world, from a cell phone or web browser\*!**

**QBU™ Storage for Mobile** enables Telecoms to offer a VAS that answers the growing demand of users, to store information and access it anywhere in the world. Uploading and organizing files is simple, and files can be kept personal or shared with friends, coworkers and family.

**With the QBU™ Storage any subscriber can:**

- Store data online – upload or download documents, unique movie streaming, music files, presentations and more.
- Simple to use – ***no installation required*** on PDA, cellular or PC.
- Access data, using any internet connection available (LAN, WAN, GPRS, CDMA etc).
- Share selected files with others.
- Create own FTP.
- Access, edit and work on files while away from office or home.
- Watch movies or listen to your music, from any Cellular / PC with web access (for streaming mode – no special software is required).

**Benefits for reseller:** (Telco, Cellular provider, VAS etc.)

- Multiple service plans from "free users" to premium.
- Create a true VAS and increase revenues.
- Enhance GPRS/ CDMA usage.
- Option to bundle, or create special "loyalty" programs.
- Easy to install and integrate into existing billing systems.
- GUI adjustable for carrier own "look n feel".
- Earn income from competitors subscribers.
- Copyrights are strictly protected.
- Special strategic partner for large storage volumes: NETAPP™
