

QBU Emails

Do you have the time, energy or diligence to manage your email backups effectively? Now, more than ever, emails have become the single most valuable non-human asset of most businesses - without it, they would be unable to conduct business. With the foray of PDA's, BlackBerries, 3G Phones and ultraportable laptops, your email data is more valuable and vulnerable. A stolen PDA, lost laptop, crashed disk or even corrupted Outlook file can cause a significant downtime and a significant loss to your business or personal email assets.

QBU Email is your most trusted data bodyguard. It creates a snapshot of all your valuable email data - emails, attachments, contacts, and all other personal folder items. It operates in the background, and requires no shutdown of your Outlook application or your MS-Exchange server. QBU Email is tightly integrated with QBU Backup, for automatic on-line backup and restore of your digital assets. QBU Email supports personal or enterprise solutions of Outlook, Outlook Express, and MS-Exchange servers. It is capable of creating a replica of all your email and personal folders data, and transfers it to a new computer or application. Use it to transfer email accounts between computers, email identities, and devices.

Protect yourself from business downtime or lost productivity. Your email data is most valuable, and deserves the best protection. QBU Mobility Package with QBU Email support provides you with the right backup and data protection tools you need.

QBU Email Features

- Backup and restore email messages, contacts and calendar items
- Transfer Email accounts between computers
- Synchronize email data between several computers, users or operating systems

The QBU Email is a member of the QBU Mobility Package:

- QBU Backup – enables you to automatically backup to web-based vault, and safely restore data remotely without the need for technical support. Restore the most recent version or previous versions of your files – using QBU Backup's unique incremental backup capabilities.
- QBU Storage – time to upgrade from Disk on Key to Disk On-Line. Safe and secured web-based environment to save, share, and access your data.
- QBU Mobile – never worry about loss of information stored on your mobile phone. Protect and transfer mobile phone information and access it from a remote web browser.
- QBU Synchronizer - synchronize all your devices - retrieve work files at home or access videos at work. With your devices in sync, you no longer have to be frustrated that your information is on another computer.

QBU Mobility Package

The QBU Mobility Package is your trusted companion for protecting your valuable data. Automatically synchronize between files and folders located anywhere – your notebook computer, PDA, Mobile phone, or Web storage. Maintain up-to-date backups and save incremental backups remotely, to protect from laptop theft or disk crashes. Keep your valuable emails in a remote vault, with simple Outlook/Exchange/Outlook Express backup utility that guards your most-valuable communication. Store your files remotely and share them with colleagues or friends, all under the same environment with the highest data security standards. The QBU Mobility Package requires no special system-admin knowledge to set up. Its automated wizards and background operations make it your most trusted data bodyguard.
