

QBU Synchronizer

Welcome to a new level of reliability, mobility, and peace of mind. Your valuable files will always be there, accessible on any device you select. The QBU Synchronizer will automatically pull or push the most current files and folders from any device to another, and guarantee that your personal laptop, home computer, file servers, office folders or web storage are constantly organized and synchronized.

The QBU Synchronizer will help you to synchronize files across multiple devices and access or share files with colleagues and friends. Furthermore, it can also synchronize Webdav folders, ftp servers and file servers over LAN or WAN protocols. The QBU Synchronizer is fully integrated with the QBU Storage. You no longer need to send large files via email, burn them to CDs/DVDs and mail them, or upload them to a website. QBU allows you to share and sync important information instantly with anyone you invite, making it the perfect solution for personal or small business use.

QBU Synchronizer Features

- Synchronize all your devices - Retrieve work files at home or access videos at work. With your devices in sync, you no longer have to be frustrated that your information is on another computer.
- Share files, photos, music, and videos with your peers - Select the content you want to share, invite members, and they will be able to access the shared files directly from their device.
- Lets you synchronize files and folders between Laptops, Desktops, Mobile Phones, File Servers, Hard Disks, USB Key Chains, NAS, etc, over LAN, WAN VPN, Bluetooth, USB connection.
- Synchronize Webdav, ftp servers, and QBU Storage servers anywhere.
- Intuitive and simple to set up and use, no sys-admin skills required. Verify the integrity of your data at any time with side-by-side view.
- Synchronize with QBU online Backup and Restore. Protect your data assets and back-up historical versions and be able to restore to any device from your QBU vault.
- Integrated with QBU Storage to allow sharing of your valuable files, music and videos with colleagues and friends.

System Requirements

- Client
Windows XP (SP2 or later)
.NET Framework 2.0
P4 1.5 GHz processor (Recommended: P4 2.5 GHz or faster)
512 MB of RAM (Recommended: 1 GB or more)
20+ MB hard drive space
Administrator rights are required to install the program

The QBU Synchronizer is a member of the QBU Mobility Package:

- QBU Backup – enables you to automatically backup to web-based vault, and safely restore data remotely without the need for technical support. Restore the most recent version or previous versions of your files – using QBU Backup's unique incremental backup capabilities.
- QBU Storage – time to upgrade from Disk on Key to Disk On-Line. Safe and secured web-based environment to save, share, and access your data.
- QBU Mobile – never worry about loss of information stored on your mobile phone. Protect and transfer mobile phone information and access it from a remote web browser.
- QBU Email – protect your valuable emails and contacts. Backup Outlook/Outlook Express or Exchange local or server-based email accounts, and retrieve them at any time to any computer.

QBU Mobility Package

The QBU Mobility Package is your trusted companion for protecting your valuable data. Automatically synchronize between files and folders located anywhere – your notebook computer, Mobile phone, or Web storage. Maintain up-to-date backups and save incremental backups remotely, to protect from laptop theft or disk crashes. Keep your valuable emails in a remote vault, with simple Outlook/Exchange/Outlook Express backup utility that guards your most-valuable communication. Store your files remotely and share them with colleagues or friends, all under the same environment with the highest data security standards.

The QBU Mobility Package requires no special system-admin knowledge to set up. Its automated wizards and background operations make it your most trusted data bodyguard.
